

The dietary management of childhood kidney diseases - CME event from the Paediatric Renal Nutrition Taskforce

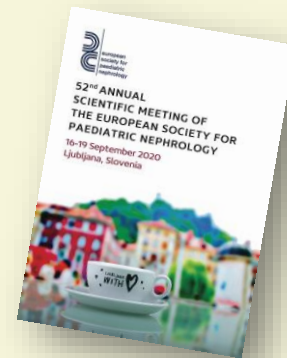

Pre-conference meeting at the 52nd ESPN
16 Sept 2020, Ljubljana, Slovenia

The Paediatric Renal Nutrition Taskforce is a team of doctors and dietitians from 8 countries who formulate clinical practice recommendations to enable best practice in the nutritional management of children with kidney diseases.

This 1-day event will include:

- guideline presentations
- case-based discussions
- workshops for practical tools and tips
- educational material for children and their caregivers

We encourage doctors and dietitians from renal units to attend together.
