

Dear Young Pediatric Nephrologists,

The ERA-EDTA Young Nephrologists' Platform runs webinars for young nephrologists - trainees and early consultants that cover all aspects of nephrology. Kate Stevens, their chair, kindly invites us to join the next session.

During their previous sessions, there were more than 80 participants from more than 40 countries.

Sessions run on Tuesdays at 4pm London time. They are 45 minutes in total and the video link is via zoom. They discuss a topic in the following format:

- a power point presentation for about 15-20 minutes by a selected young speaker.
- then a panel discussion with 3-4 expert panellists or Journal Editors and questions from the audience.

The sessions are recorded and then put onto youtube, the GlomCon website (<https://glomcon.org>) and the YNP website (<https://web.era-edta.org/young-nephrologists-platform-ynp>).

On 12th February at 4pm London time, Adrian Lungu from YNP will present on genetic aspects of kidney disease focussing on FSGS/steroid-resistant nephrotic syndrome.

Details will follow about how to join the session.

Wishing you all the best for 2019

Olivia Boyer, YPNP Chair
