The screenshot shows the PNRRC website with a navigation menu and several content sections. The navigation menu includes: HOME, ABOUT US, PUBLICATIONS & GRANTS, INDUSTRY, EVENTS, RESOURCES, STUDIES, MEMBERS. The main content area is divided into two columns. The left column contains the PNRRC MISSION statement: "To improve and promote high quality care of pediatric nephrology patients". The right column contains the PNRRC AIMS, which are: "To develop and perform multi-center retrospective and prospective clinical and translational studies addressing important clinical problems faced by nephrologists" and "To provide opportunities for pediatric nephrology fellows and junior faculty to participate in multi-center clinical and translational studies and publications to enhance their career development". Below the mission and aims, there are two more sections: MEMBERSHIP and UPCOMING EVENTS. The MEMBERSHIP section describes the four categories of membership and their benefits, with a "Read more" button. The UPCOMING EVENTS section lists two events: "PNRC 2022 Spring Members Meeting" and "Sponsor/Exhibitor PNRRC Spring 2022 Virtual Meeting", both on 03/25/2022 at 10:00 AM. A blue banner at the bottom of the events section states "Registration now closed! Contact us if you have any questions." The PNRRC logo is in the top left, and a "Go to ESPN-PNRC Program" link is in the top right. A "Member Login" button and a search bar are also visible in the top right.

WELCOME ESPN-PNRC

The European Society for Pediatric Nephrology (ESPN) and The Pediatric Nephrology Research Consortium (PNRC) have created a joint research program to provide funding and opportunity for researchers from each organization to conduct research on shared projects.

The decision to create a joint research program is born out of a desire to promote greater partnership and collegiality between our colleagues in Europe and North America. Hopefully, this will in enhance our collective ability to improve the care of children with kidney disease through collaboration and research.

This ESPN-PNRC collaborative effort will create the ESPN-PNRC Joint Research Program to fund research that is jointly conducted within both the ESPN and the PNRC. Each project must be co-led by researchers from each organization.

Proposed projects may be clinical or translational research in design. The total grant award will vary as funds and needs dictate. Each award will comprise funds to support eligible research activities and can include funds for travel to further collaboration and/or enable a presentation at international professional meetings and other supplies/resources needed to accomplish the research project.
